

## DO YOU HAVE A HEARING LOSS?

---

YES NO

- Do you have difficulty hearing in restaurants?
- Do you find yourself asking others to repeat themselves?
- Do many people you talk to seem like they mumble?
- Do you misunderstand what others say and often respond inappropriately?
- Do others complain that you turn the TV volume up too loud?
- Do you have difficulty hearing on the phone?
- Do you have to strain to understand and follow a

If you answered yes to two or more of these questions, you may have a hearing loss and might consider a hearing evaluation by an audiologist.

# ASSISTIVE LISTENING DEVICES

## TV EARS

As a personal listening device, TV Ears provides the listener with a louder, and clearer TV signal without disturbing others.

The lightweight headset communicates wirelessly with your TV through an infrared signal. TV Ears come with rechargeable batteries and multiple headsets can be linked to the same television.

## AMPLIFIED PHONE

An amplified telephone makes incoming calls louder for the listener. Many amplified telephones help make the phone call easier to understand by emphasizing the speech range.

The large back-lit buttons and bright visual ringer make the phone very easy to use.

\*Amplified phone also have the option for close captions with internet access

## POCKET TALKER

A Pocket talker is an easy to use and portable personal amplifier that provides users with the ability to hear better in difficult listening situations. It is ideal for one-on-one conversations and small groups.

The listener wears a headset while the speaker talks into a microphone. Battery operated and minimal maintenance.

# ALERTING SYSTEMS

## ALARM CLOCK WITH BED SHAKER

In combination with the alarm clock signal, the bed shaker vibrates the bed when the alarm goes off. The bed shaker is placed under the bed or pillow for alerting.

## FIRE ALARM ALERTING SYSTEM

Ideal for deaf or hard of hearing people who might not wake up to a standard smoke detector.

Alerting can be done with a bed shaker, flashing lights, and/or a low frequency alarm tone to gain the attention of the listener.

## DOORBELL SIGNALER

Notifies home owner when someone is at the door with either flashing lights or an amplified signal when the doorbell is pushed.
